GO_Biological_Process_2021
protein export from nucleus (GO:0006611)
regulation of proteasomal protein catabolic process (GO:0061136)
nucleotide-excision repair (GO:0006289)
termination of RNA polymerase I transcription (GO:0006363)
regulation of gene silencing by miRNA (GO:0060964)
rRNA base methylation (GO:0070475)
aerobic electron transport chain (GO:0019646)
transcription initiation from RNA polymerase I promoter (GO:0006361)
positive regulation of telomere maintenance (GO:0032206)
mitochondrial ATP synthesis coupled electron transport (GO:0042775)
